Frequently Asked Questions

What is the IIPGH Coding Program about?
The IIPGH Coding Program introduces children to computer programming through interactive and user-friendly platforms, fostering a love for coding while teaching fundamental programming concepts. Additionally, we offer courses tailored for older students to further enhance their coding skills.

What will my child gain when enrolled on the coding program?
Enrolling your child on the coding program will equip them with valuable problem-solving skills, enhance logical thinking, and foster creativity in a technology-driven world, preparing them to function effectively in the workplace.

Do I need any prior coding experience to enroll in your courses?
No prior coding experience is required to enroll in our courses. We offer courses suitable for beginners, as well as those with some coding background.

What age groups are your courses suitable for?
We accept students as young as 6 years and older.

How often are new cohorts or classes starting for the Coding Program?
New cohorts for the Coding Program begin in the first week of every month except January and December.
Do you have specific registration periods?
Registration is open anytime within every month except the month of December. As such students can apply to our coding program anytime.

Are your courses in-person, online, or a combination of both?
Regular classes are mainly held online, with occasional in-person sessions. Private tuition students can choose whether to have classes online or in-person.

Can international students enroll in the program?
Our programs are open to everyone no matter their location.

What type of technical equipment or software will I need for the course?
A student will need a laptop/desktop computer with stable internet connection to join the class.

What is the cost of your coding courses, and are there any discounts available?
Private tuitions go for GHC1,500 for online sessions and GHC2,000 for in-person. Regular tuitions go for GHC300/GHC800 per month depending on the module. Fees are subject to review.

How long does it typically take to complete a course?
The duration of our courses can vary, based on the modules. As a guide, each module is completed in an average of 2 months / 16 sessions for private tuitions and 3 months / 24 sessions for regular tuitions.

What is the time commitment required per session?
Classes take 2 hours, 2 sessions per week. Classes are scheduled at a particular time per module based on the following time slots:
- Saturdays (10am - 12pm) and Sundays (2pm - 4pm);
- Saturdays (4pm - 6pm) and Sundays (4pm - 6pm).

How long does it typically take to complete the whole program?
A young student beginning the coding program, without breaks, should take an average of 4.5 years to complete the whole program. An older student may have a varying period based on their choice of module.

Can I take a break?
A student can take a break after completing the module they are enrolled in.
